Imagine you're screening studies and you see data from the same clinical trial spread out across multiple papers. You might include all these studies, but it's important to differentiate studies from reports. Each clinical trial is a study that in this case has multiple reports published. We would want this information reflected in the PRISMA diagram so that it is clear to the reader the number of unique datasets that are in the review versus the number of reports.

On the NK site, you can mark a study as a related report, and our software will automatically adjust

the PRISMA diagram to reflect this. You can mark a paper as a related report directly in the screening module(s) or in study inspector, both display the same format:

1. To mark a study a related report, click on the "Related Reports" tab.

Related Reports

Last update: 2023/12/06 wiki:autolit:screening:relatedreports https://wiki.nested-knowledge.com/doku.php?id=wiki:autolit:screening:relatedreports&rev=1701865360 12:22

The workflow is the same regardless of what area of the site you perform this action.

2. Search for the related report.

The search only applies to this nest in AutoLit. You can search using the title, author, or year.

4. Alternative - Mark a study a Duplicate

Under the Related Reports tab, you also have the ability to Mark studies as Duplicates. If you find a study that was not automatically de-duplicated, click Related Reports, select Mark Duplicate, and then select the original study. Completing this action will remove the study from your screening queue and put it in the duplicate queue.

5. Select which study is the primary report.

98 2022	Abstract Full Text Supp	elements Related Reports		C	CT.gov	\searrow		AB FT Tag

6. When you go to the PRISMA diagram, it will reflect both the number of studies and the number of reports in the bottom left box.

Clinicaltrials.gov Integration:

When you run a search on clinicaltrials.gov on the NK platform, related reports can be bibliomined. To use this feature, go to Related Reports for the record of interest, and select "Bibliomine NCT":

2024/06/01 11:12

Related Reports

95 2017	Abstract Full Text Supp	lements Related Reports		C	CT.gov	9	(AB FT Tag)

						+	History	\sim

For any record published on clinicaltrials.gov, the NCT code for that trial will be automatically searched on PubMed and be marked as "Related" on this page.
