2024/11/01 00:19 1/1 Meta-Analysis Software

Meta-Analysis

This page is under construction. Want to contribute? Contact us.

Different software applications are able to perform a meta-analysis (Muka et al., 2020).

STATA

The "metan" command in STATA is a simple way to perform a meta-analysis: Meta-analysis in Stata

R

The meta-analysis package meta is available in the open-access software environment R. Meta package

RevMan

Further, Review Manager (RevMan) developed by the Cochrane Collaboration may be a good choice for those who are new to the world of meta-analysis.

Excel

Excel add-ons such as MetaEasy or MetaXL.
