Protocol Writing

Protocol Template

Be sure to fill out each field in the protocol template.

*Indicates that a field is required
Note: It is recommended to answer optional fields for the review to be ready for publication, but may not be required if the results are not intended for publication.

:wiki:guide:plan:protocoltemplate.docx

Consider registering the protocol on PROSPERO

If time permits, PROSPERO registration is highly recommended since it improves the credibility of a review. PROSPERO registration must be done before data extraction is started.

PROSPERO Registration

To find instructions about how to register your project in PROSPERO –> PROSPERO Registration Instructions

---

Tips

1. Make sure you have NOT begun to extract any data for your review, otherwise, you cannot register at this point.

2. PROSPERO only accepts registrations for reviews with ***health-related outcomes*** .

3. Double check in sources like PubMed, that your specific review has not already been done.
