

Protocol Writing and Registration

Protocol Template

Here is a [template](#) that you can use for your protocol.

Consider Registering the Protocol on PROSPERO

If time permits, PROSPERO registration is highly recommended since it improves the credibility of a review. However, PROSPERO registration must be done before data extraction is started.

Here are [PROSPERO registration Instructions](#) to register your project. You will need to create an account and enter answers to these questions.

Here is an example of a [completed PROSPERO registration](#) that you can look at.

PROSPERO Tips and Warnings

1. Make sure you have NOT begun to extract any data for your review, otherwise, you cannot register at this point.
2. PROSPERO only accepts registrations for reviews with **health-related outcomes** .
3. Perform a search in PubMed to verify that your specific review has not already been done.
