

Demo Nests

Want to try out Nested Knowledge, but don't have a research question in mind? Don't want to make an upfront time investment building a nest? No problem, see how both AutoLit and Synthesis work from complete examples!

The below links are walkthroughs of demos you may open from your [Nests Homepage](#) and clicking “Demo Nests” on the left hand side.

WELCOME TO

AutoLit

Create or select a nest to search, screen, tag, and extract data from studies for a specific review.

My Nests

	Name	Owner	Records	Included	Created	Last Accessed	AutoLit	Synthesis
<input type="checkbox"/>	Example Nest	Wiki Documentation	-	-	2024-05-17	2024-05-17	AutoLit	Synthesis

You have the choice of three different demo nests depending on your research project type!

Open a Demo Nest

Check out one of our demonstration nests from previously published reviews. They are partially complete to give you an idea of what a nest looks like.

Each demo has a corresponding wiki page to walk you through the nest yourself. All demos are copies you own (don't worry about breaking anything!) and are accessed in AutoLit.

Demonstration Nests

Nest	
CER of Aspiration Catheter	Start Demo
NSCLC: Tyrosine Kinase Inhibitors	Start Demo
Heart Failure: ACE Inhibitors & ARBs	Start Demo

[Cancel](#)

Clinical Evaluation Report: Aspiration Catheter

- Our [Clinical Evaluation Report: Aspiration Catheter](#) nest is a demonstration of a previously-completed review as part of a CER project, presenting the tools at each stage to appraise the Aspiration Catheter: Penumbra Indigo. It is partially completed to allow you to explore the site.

Non Small Cell Lung Cancer (NSCLC): Tyrosine kinase inhibitors (TKIs)

- Our [NSCLC: Tyrosine Kinase Inhibitors](#) nest examines the treatment of NSCLC with various types of tyrosine kinase inhibitors. This is based on a published [Institute for Clinical and Economic Review \(ICER\) review](#).

This nest is specifically designed to meet the requirements of Health Technology Assessment (HTA) body: [National Institute for Health and Care Excellence \(NICE\)](#).

Heart Failure: ACE Inhibitors & ARBs

- Recent advances in ARBs, a new class of drug for heart failure with reduced ejection fraction, inspired our [Heart Failure: ACE Inhibitors & ARBs](#) nest. Here, we compare the more conventional drug class (ACE Inhibitors) against ARBs.
