

# Dashboard

Dashboard is a feature that allows you to create customizable cards to present specific findings in Synthesis alongside our auto-generated outputs: Qualitative Synthesis, Quantitative Synthesis, Critical Appraisal, PRISMA etc. These cards update as new data is inputted into the nest and are also easy to download for external use.

## Toggle Dashboard on in Settings

In any nest, by default, Dashboard is not enabled. To enable the Dashboard feature, head to Settings and toggle on under Synthesis:

### Synthesis

Synthesis outputs are generated in part by the actions taken in AutoLit. Turning on these outputs will allow you to visualize and share tags and gathered data.

#### Choose which outputs to display:

☒ Qualitative Synthesis

☒ Quantitative Synthesis

☒ Manuscript

☒ Dashboard

☒ Critical Appraisal

☒ PRISMA Diagram

After toggling Dashboard on, “Dashboard Editor” will be displayed underneath the Synthesis menu item:

Nest Home

### Synthesis

Synthesis outputs are generated in part by the actions taken in AutoLit. Turning on these outputs will allow you to visualize and share tags and gathered data.

### Nest Access

Making this nest public will allow anyone on the internet to search for and see your nest's Synthesis. This does not grant the public editing access via AutoLit.

Making this nest protected will add a secret key to its Synthesis URLs, making them undiscoverable and inaccessible to those without the key (or explicitly granted access). You will still be able to share a link with external parties, and the external party will not have to log in to view Synthesis.

Making this nest private is the most secure option. Only users with explicitly granted access (either as an individual user or through their organization) will be able to view Synthesis.

#### Choose which outputs to display:

☒ Qualitative Synthesis

☐ Quantitative Synthesis

☐ Manuscript

☒ Dashboard

☐ Critical Appraisal

☒ PRISMA Diagram

#### Nest Access:

☐ Public

☒ Protected

☐ Private

Expire & Regenerate Key

#### Current Link to Synthesis:

https://nested-knowledge.com/nest/4691

Note: When you toggle on Dashboard, Manuscript Editor is automatically toggled off, but don't worry--no work is lost when you switch between features.

## Using Dashboard Editor

Navigate to Dashboard editor, and click the “+” icon in the top right to start adding cards by selecting

your desired option.

Nest Home

Start adding cards to your dashboard by clicking '+' on the right!

## Dashboard Card Types

The card options are listed for you to choose from; we currently offer the following card types:

- **Text Card** = allows customized text input; the text editor offers the same tools as Abstract & Manuscript Editors

Research Question

H B I U S ☰ ☷ 📊 🔗 🖼️ ↶ ↷

This nest focused on the following research questions:

- How did the general adult population fare in the short-term after COVID-19 diagnosis?
- How did the pediatric population fare after COVID-19 diagnosis?
- How do adult vs pediatric populations compare in terms of COVID-19 recovery?

Cancel

Add

Once added, the text card will be displayed as a card on the Dashboard:

**Rilzabrutinib for the Treatment of Chronic Spontaneous Urticaria in Patients Who Remain Symptomatic Despite the Use of H1 Antihistamine (RILECSU)**

Sanofi

11/24/2021

Abstract Data Tags Searches Google Scholar

Brief Summary: The first phase of this study will be a parallel, 12-week treatment, Phase 2, double-blind, 4 arm study to assess the **safety and effectiveness** of 3 oral doses of SAR444671 (rilzabrutinib), i.e. dose A, B and C, compared with placebo for decreasing the frequency and severity of itch and urticaria in male and female participants aged 18 years inclusive or older with CSU. After completion of the double-blind phase of the study, participants will be given the option of enrolling in the 40-week open label extension (OLE) phase of the study. Participants will receive open-label rilzabrutinib at dose C (the dose may be modified based on the 12-week safety and efficacy data). Due to the fact that some participants may be receiving rilzabrutinib for the first time, all participants will be monitored at Week 14, Week 16, Week 20, and Week 24. Afterwards, participants will be monitored at Week 36 and Week 52. Detailed Description: **Study Type:** Interventional **Actual Enrollment:** 161 participants **Status (as of import):** Active, not recruiting

## Editing Dashboard Display

After mixing and matching your desired cards, you can adjust and move them as they are displayed in the editor and this will alter how they are displayed in Synthesis:

1. Drag and Drop cards by click anywhere within the card and moving their position
2. Expand or reduce the size of each card using the arrow in the bottom right corner, other cards will move accordingly

## Other Tools

1. Expand each card into an easy-to-view modal by clicking the arrows in the top left
2. View the card description by hovering over the “i” icon in the top right
3. Edit, download, or delete each card by using the pencil, download and “X” icons, respectively
  1. Text card exports as a word doc
  2. Table card exports as a .csv file
  3. Image and PRISMA cards export as a .jpg file

Note: the Download function is currently only available for Text, Table, Image, and PRISMA card types.

The screenshot displays the Nested Knowledge dashboard interface. On the left is a sidebar menu with options: Nest Home, Activity, Settings, Literature Search, Abstract Screening, Full Text Screening, Tagging, Study Inspector, and Synthesis. The main area contains several cards: 'Research Question' with a list of COVID-19 related queries, 'Example Title' with a table of Rilzabrutinib data, 'Nested Knowledge Logo', 'PRISMA 2020' flow diagram, 'Example Text' card, and 'Study Highlight' for Rilzabrutinib. A red box highlights the 'PRISMA 2020' card, and another red box highlights the 'Example Text' card. The 'Study Highlight' card shows a brief summary of a clinical trial.

## Dashboard in Synthesis

To access Dashboard, head to Synthesis and click the “Dashboard” menu item. The appearance of Synthesis Dashboard will be exactly as configured in Dashboard Editor. Here you can expand each card, view associated descriptions, and download available cards.
