

# Critical Appraisal Visuals

Nested Knowledge automatically generates your Domain Distribution and Traffic Light diagrams if you complete Critical Appraisal through our AutoLit [Critical Appraisal module](#).

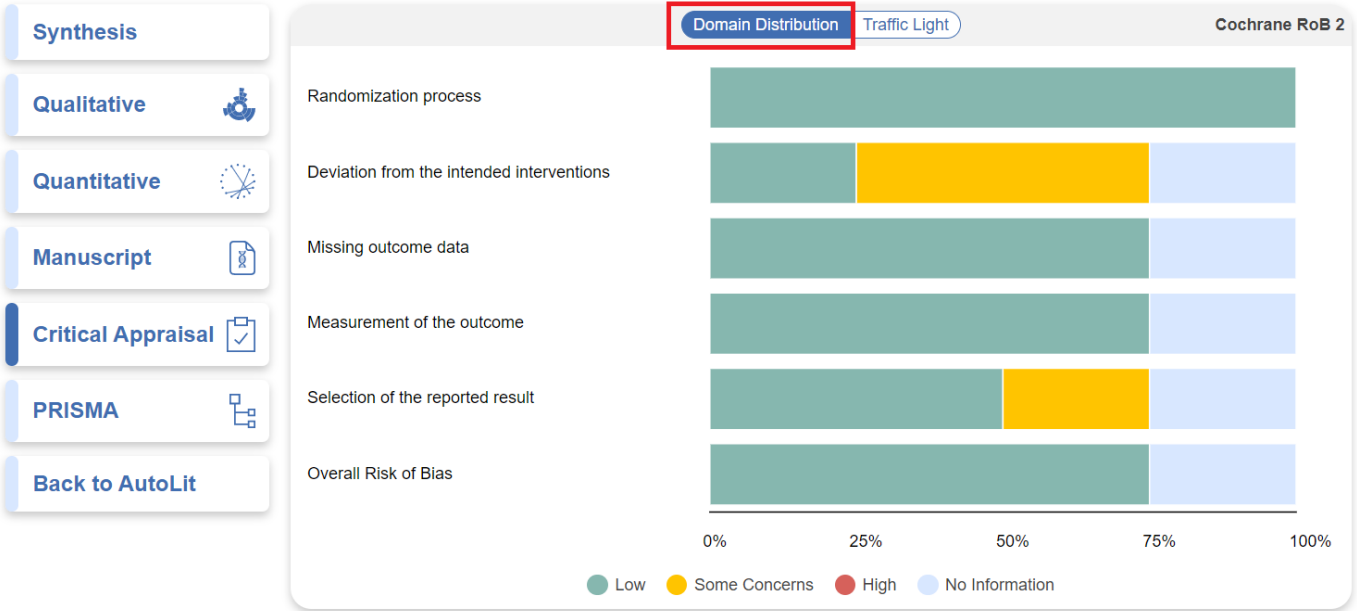

## Navigating to Critical Appraisal Visuals

Critical Appraisal visuals are found on the Synthesis page, at the bottom of the Contributors column:

The screenshot shows the 'Synthesis: Acute Ischemic Stroke - RCTs' page. On the left is a navigation menu with the following items: 'Synthesis' (selected), 'Qualitative', 'Quantitative', 'Manuscript', 'Critical Appraisal' (highlighted with a red box), 'PRISMA', and 'Back to AutoLit'. The main content area is titled 'Abstract' and contains the following text: 'Kristen Hutchison, Hassan Kobeissi, Gautam Adusumilli, Kathryn Cowie, Nicole Hardy, Dylan McDowell, Ranita Tarchand, John Pederson, hamid.saber null, Kevin Kallmes', 'Last Edited: 2022-11-14', and 'This nest does not yet have an abstract. You can create an abstract by heading back to AutoLit's [Abstract Editor](#) under the Synthesis tab.' Below the abstract is a 'Key Insights:' section with a sub-header 'Insights appear here' and a 'View in Context' button. The text below this sub-header reads: 'Insights consist of a title, description, and a Synthesis configuration. You can create insights and directly associate the supporting data in the Qualitative Synthesis tab.'

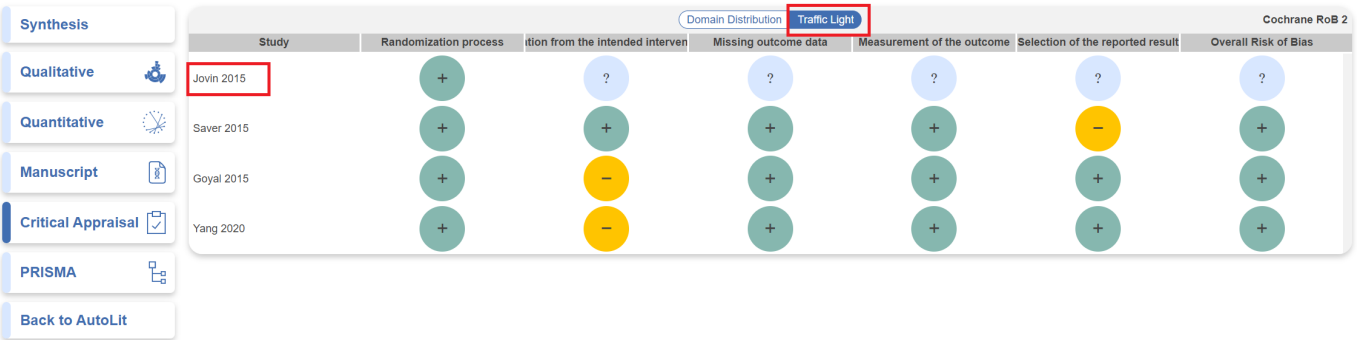

## Domain Distribution Diagram

Once you have navigated to the visuals, you can see the Domain Distribution plots. The categories presented will depend on the Critical Appraisal survey you completed; in the visual below, see the [Cochrane RoB2 tool's](#) outputs for Internal Validity and Overall Assessment of risk. These represent global assessments across a nest, rather than study-level outputs.

## Traffic Light Diagram

Traffic Light diagrams represent study-by-study assessments, where each column is a study-level assessment of the category in question (here, the Internal Validity and Overall Assessment from [Cochrane RoB2 tool's](#) survey).

The study Author/Year (red box) is clickable, opening the Study Modal showing the abstract, data, tags, and search history for the study in question.
