

Nest Protocol

Purpose

The Nest Protocol outlines the goal, scope, and key tasks of your systematic literature review or meta-analysis. In it, the project leadership should provide critical background information, the context of the review, and primary and secondary endpoints.

Editing the Protocol

While the Protocol can be viewed from Nest Home, it is only editable from Nest Settings.

1. Navigate to Settings

See [Nest Settings](#) for navigation instructions

2. Select Protocol Editor

Write the Protocol

Add headers, bullet points, and bold font. There is no one-size-fits all formula for a protocol! The goal of a 'best practices' protocol should be: enable someone unfamiliar with the project to carry out any of the Search, Screening, Tagging, Extraction, or interpretive tasks in your project in the same way

that you, as project lead, would do.

Show Table of Contents

ProtocolDescription

Objective

To determine the importance of screening for Dihydropyrimidine Dehydrogenase (DPD) deficiency in patients undergoing 5-FU based chemotherapy

Scope

Clinical trials, retrospective studies or prospective studies evaluating outcomes related to toxicities in patients undergoing 5-FU based chemotherapy with DPD deficiency versus with no DPD deficiency.

Primary Outcomes

- Risk of Severe adverse effects (*grade 2 or above*) in population with dpd deficiency
- Allele frequency
- Prevalence of dpd deficiency in patients undergoing 5\ -fu based chemotherapy for various cancers

Secondary Outcomes

- Effect of combination therapies
- Type of combination drug attributable to the serious adverse effect
- Type of the serious adverse effects with the therapy
- Percentage of DPD negative patients with adverse effects
- Percentage of DPD positive patients with no adverse effects

Share the Protocol

The protocol will appear at the nest home! Ensure that all reviewers on your team know where to find the Protocol. Optionally, you can download the protocol as a Word document in one-click.

The Protocol generally does not usually include specific reviewing instructions; it contains generalized nest methods. Be sure to communicate individual instructions and deadlines outside of the Protocol's contents.
