We are currently in the process of transitioning our module names with the goal of making the AutoLit workflow easier to understand for first-time users.

Tagging is now **Extraction**, **Extraction** is now **Meta-Analytical Extraction**, and **Risk of Bias** is now **Critical Appraisal.**

Bear with us as we edit our documentation (don't worry, no feature functionality has changed!) and, as always, contact us at support@nested-knowledge.com if you have any questions.
