Bibliomine

When you are performing your literature review, it is often useful to be able to quickly grab references from other papers on your subject of interest. Bibliomining, or citation mining, refers to the act of identifying relevant studies by reviewing and importing the citation list of a study with high relevance to your research question.

1. Navigate to Other Sources

Nest Home	Show Table of Contents Protocol Description Materials
	Research Question:
Literature Search 2/2 Other Sources	Create clinical guidelines for treatment of Acute Ischemic Stroke based on current literature.
Duplicate Review iearch Exploration Query Builder	Background:
Screening 335/343 Configure Exclusion Reasons Adjudicate Screening Study Inspector	Based on a previous meta-analysis in 2014, the sooner intravenous alteplase is administered, the higher the functional outcome was noted for the patients. IVT has been recognized as a mainstay treatment for known time of symptom onset and eligible patients. (https://www.uptodate.com/contents/approach-to-reperfusion-therapy-for-acute-ischemic-stroke?topicRef=16134&source=see_link)
Tagging 17 / 17 Configure Study Tags Study Inspector	The bridging therapy which is IVT followed by Mechanical Thrombectomy is recommended for patients who qualify for both therapies. This approach may lead to better functional outcomes. (https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5863300/#ffn_sectitle)
Extraction 17/17	As the first line of treatment, IVT should be considered for patients who are also eligible for MT. Bleeding complications are a risk for the AIS patients who undergo IVT and should be watched for. (https://www.ahajournals.org/doi/10.1161/STR.00000000000000211)
Risk of Bias 17/17	A relevant, published meta-analysis making a similar comparison can be found here: https://www.ahajournals.org/doi/10.1161/STR.0000000000000211.
Synthesis	Search Strategy:
Aanuscript Editor Export	Our search strategy was not based on any previous papers. We used a search strategy to find papers that had some combination of "solitaire", "trevo", "penumbra" and "RCT", "Randomized controlled trial"
Admin	We ran a second search that included key words as "acute ischemic stroke", "AIS", "thrombectomy", "endovascular" and "RCT", "randomized controlled trial". We only included RCTs and ran our search

and comple retrieved fr may then s	rticle aphy will be aut ete bibliographic om PubMed an elect and prome for import into	data will be d CrossRef. Y ote the mine	e You
Upload a	.pdf		1
		Biblion	nine

At this point, your records will still require review before being added to your nest!

4. View Bibliomined References

When finished, your references will still Require Review! In this step, you should examine the bibliographic data (Title, author information, PMID/DOI if present); since this process involves pulling text from PDFs, there is a chance that the bibliographic data are incorrect.

Select the eye icon to view the references pulled from the uploaded study.

5. Review Reference Information

Clicking the eye icon will open a page displaying title, abstract, PMID/DOI/link, and the option to delete records:

Bibliomined Studies						
Title	Author	Link	Delete			
Comparative efficacy and tolerability of 15 antipsychotic drugs in schizophrenia: a multiple-treatments meta-analysis.	Leucht, Stefan	PubMed: 23810019	×			
Aripiprazole versus placebo for schizophrenia.	Belgamwar, Ravindra B	PubMed: 21833956	×			
Checking consistency in mixed treatment comparison meta-analysis.	Dias, S	PubMed: 20213715	×			
A randomized, double-blind, placebo-controlled, study of the efficacy and safety of aripiprazole 10, 15 or 20 mg/day for the treatment of patients with acute exacerbations of schizophrenia.	McEvoy, Joseph P	PubMed: 17631314	×			
The efficacy and safety of lower doses of aripiprazole for the treatment of patients with acute exacerbation of schizophrenia.	Cutler, Andrew J	PubMed: 16946694	×			
Efficacy and safety of aripiprazole and haloperidol versus placebo in patients with schizophrenia and schizoaffective disorder.	Kane, John M	PubMed: 12363115	×			
The positive and negative syndrome scale (PANSS) for schizophrenia.	Kay, S R	PubMed: 3616518	×			
Comparative effects of 18 antipsychotics on metabolic function in patients with schizophrenia, predictors of metabolic dysregulation, and association with psychopathology: a systematic review and network meta-analysis.	Pillinger, Toby	PubMed: 31860457	×			
Automating network meta-analysis.	van Valkenhoef, Gert	PubMed: 26053422	×			
· · · · · · · · · · · · · · · · · · ·			Close			

For any reference that is incomplete or incorrectly recognized in the underlying PDF, select the "x" to delete. For example, if an incomplete title is saved or a blank row has been inserted (see example below), delete those references before sending to screening.

An adaptive randomized controlled trial of non-invasive respiratory strategies in acute respiratory failure patients with COVID-19	Perkins, GD	Google Scholar	×
-epidemiological-update-on-	covid-	Google Scholar	×
Mortality outcomes with hydroxychloroquine and chloroquine in COVID-19 from an international collaborative meta-analysis of randomized trials	Axfors, C	Google Scholar	×
			×
A randomized clinical trial of the efficacy and safety of interferon $\boldsymbol{\beta}\text{-}$	Davoudi-Monfared, E	Google Scholar	×

You can still add any of these references manually, but ensure that you have removed any incorrect citation information before selecting "Send to Screening."

Bibliographic Data

For records with a PMID or DOI, the bibliographic data will be automatically imported. Otherwise, you **will likely need to edit the record's bibliographic data during the Screening process**; we provide a Google Scholar link where possible to help you find the record, but the bibliographic data in AutoLit are based on what was reported in the underlying PDF.

Send to Screening

When you have finished viewing and editing the references from a PDF, select "Send to Screening" from the main Biblio-mine page to queue all studies for Screening. **This step is irreversible,** so do not press Send to Screening until you have finalized the references you would like to import!

Q. What if the uploaded Systematic Review reports the included trials in a supplementary appendix or a table only?

2022/05/24 wiki:autolit:search:bibliomine https://wiki.nested-knowledge.com/doku.php?id=wiki:autolit:search:bibliomine&rev=1653421826 19:50

A. The biblio-mining tool depends on being able to recognize a consistent format for references in the uploaded article's bibliography. Materials found only in tables or supplementary resources will not be identified, and formats not supported by the bibliomining tool may need to be manually removed before finalizing your list of studies to be queued.
