

Nest Dashboard

Nest Dashboard allows a team of researchers to stay up to date with the progress of their review, as well as seeing [Synthesis](#) view counts.

View Contributions

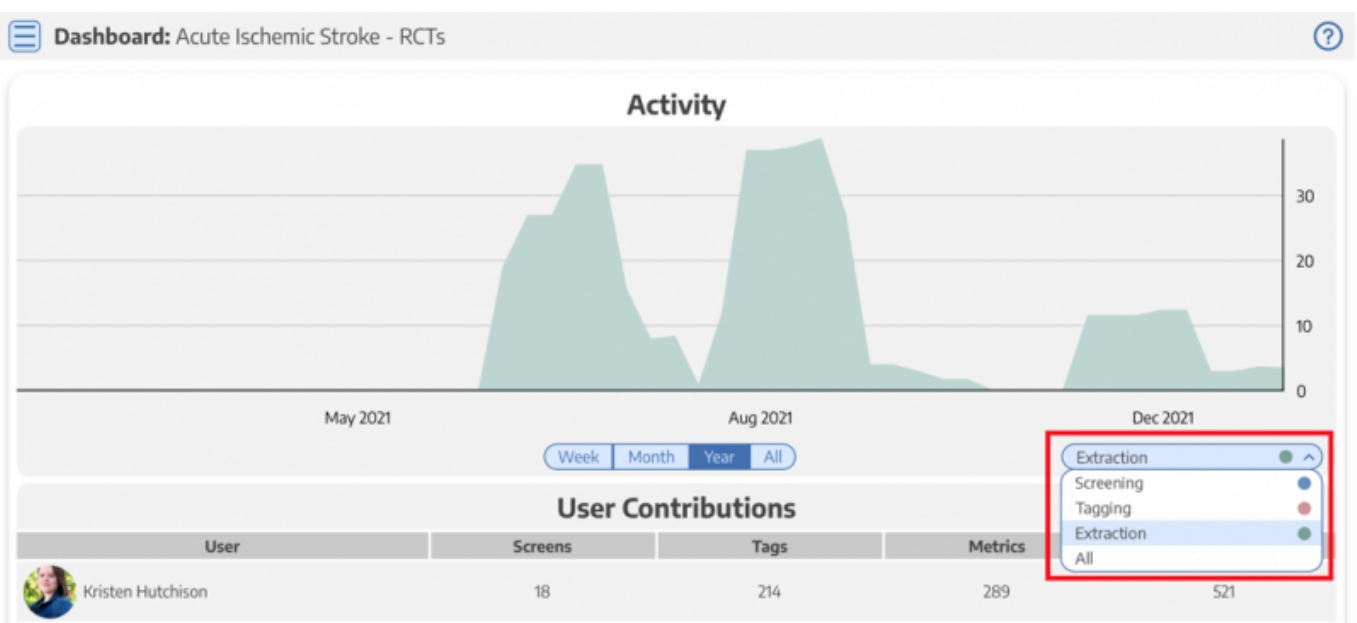

View nest activity in a specified time period: the last week, month, year, or all time.

Metrics refers to extracted data elements.

Filter by Stage

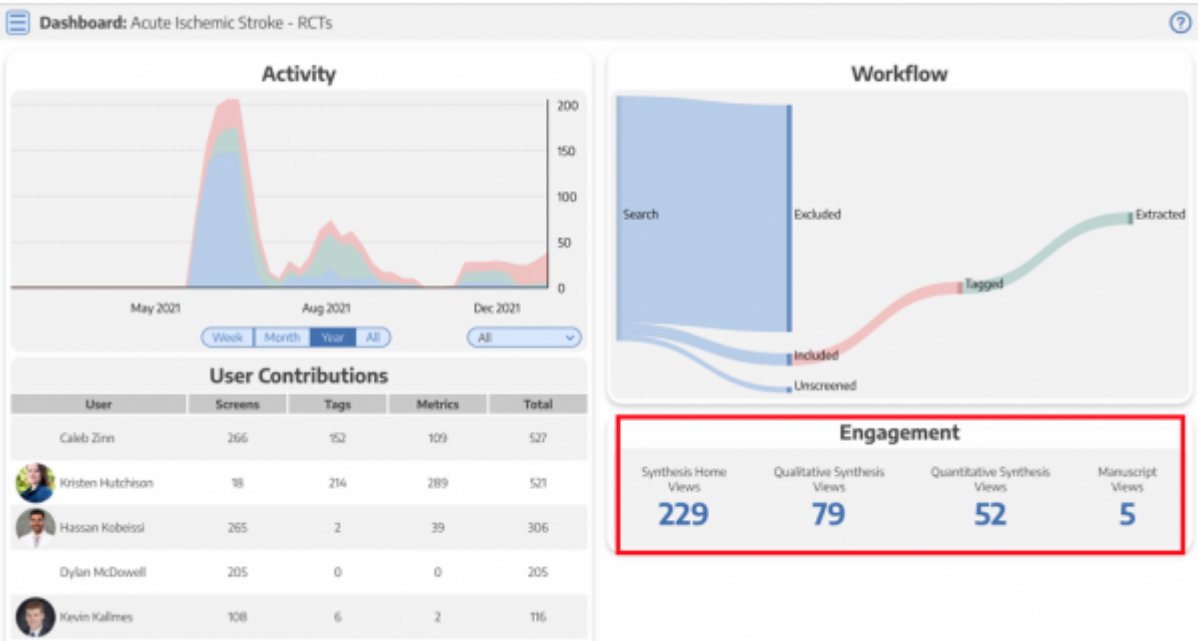

Filter activity by the stage of the Systematic Review.

Living systematic reviews undergo revisions and updating. For such reviews, you can expect to find an activity pattern with multiple peaks corresponding to the initial round, as well as subsequent updates.

View Nest Engagement

Nest outputs can be configured to be public or private. Check the amount of times that people have viewed the nest outputs. For public nests, these measures approximate engagement with the data and visuals.

You can discuss the progress of a Nest with the [Comments](#) feature.
