

Export RIS Files

How to Export a RIS File

RIS Export is meant to enable you to create a bibliographic/library file containing the metadata for records from the nest. The resulting download should be compatible with conventional reference managers (e.g. Zotero).

1. Go to Study Inspector

To enable you to export any subset of studies' bibliographic information, we have placed the Download RIS Export function in [Study Inspector](#).

Objective

Determine whether endovascular thrombectomy in patients presenting with acute basilar artery ischemic stroke results in better functional and angiographic outcomes than medical therapy alone

Scope

Clinical trials or prospective studies designed at evaluating clinical outcomes (functional and imaging) in basilar stroke patients undergoing endovascular thrombectomy or medical therapy for acute basilar artery ischemic stroke

Population

Patients presenting with acute basilar ischemic stroke within 12 hours of symptom onset

Primary Outcomes

- Good functional outcome, defined as mRS 0-3

Secondary Outcomes

- Functional independence (mRS 0-2) at 90 days
- Rate of TICI 2b/3 recanalization
- Rate of early neurological improvement (NIHSS improvement of >8 or NIHSS 0/1 at 24 hours)
- All-cause mortality
- Occurrence of symptomatic ICH
- Occurrence of distal emboli post-procedure
- Onset-to-needle time
- Onset to puncture time

Interventions and Comparators

Interventions	Comparator Arms
<ul style="list-style-type: none">Endovascular thrombectomy primarily includes either stent retriever or aspiration catheter or a combination of the two<ul style="list-style-type: none">Medical therapy primarily includes IVT, but can also include urokinase, systemic anticoagulation, antiplatelet drugs, etc	<ul style="list-style-type: none">Medical therapy primarily includes IVT, but can also include urokinase, systemic anticoagulation, antiplatelet drugs, etc

2. Filter to the desired studies

Apply the filters that narrow the set of studies to those you want to export. Note that, without any filters, you will export the bibliographic information for **all studies, including excluded studies**.

3. Select "RIS Export"

Only after you have applied the desired filters should you select the “Download” button in the upper right.

Once you have selected “Download,” a modal will open, in which RIS Export should already be automatically selected. Select the “Download” option in the bottom right of the modal, and your RIS File should begin downloading!
