

Demo Nests

Want to try out Nested Knowledge, but don't have a research question in mind? Don't want to make an upfront time investment building a nest? No problem, see how both AutoLit and Synthesis work from complete examples!

The below links are walkthroughs of demos you may open from your [AutoLit Home](#) and clicking “Demo Nests” on the left hand side.

WELCOME TO

AutoLit

Create or select a nest to search, screen, tag, and extract data from studies for a specific review.

<input type="checkbox"/>	test2	Nicole Hardy	6146	Nov 19, 2022	Nov 19, 2022

You have the choice of three different demo nests depending on your research project type!

Open a Demo Nest

Check out one of our demonstration nests from previously published reviews. They are partially complete to give you an idea of what a nest looks like.

Each demo has a corresponding wiki page to walk you through the nest yourself. All demos are copies you own (don't worry about breaking anything!) and are accessed in AutoLit.

Demonstration Nests

Nest	
COVID-19: Antivirals	Start Demo
NSCLC: Tyrosine Kinase Inhibitors	Start Demo
Heart Failure: ACE Inhibitors & ARBs	Start Demo
Cancel	

COVID-19: Anti-virals

- Our [COVID-19: Antivirals](#) nest was [published](#) in BMC Infectious Disease in January 2022. You can use a copy of the nest to practice searching the COVID-19 literature.

Non Small Cell Lung Cancer (NSCLC): Tyrosine kinase inhibitors (TKIs)

- Our [NSCLC: Tyrosine Kinase Inhibitors](#) nest examines the treatment of NSCLC with various types of tyrosine kinase inhibitors. This is based on a published [Institute for Clinical and Economic Review \(ICER\) review](#).

This nest is specifically designed to meet the requirements of Health Technology Assessment (HTA) body: [National Institute for Health and Care Excellence \(NICE\)](#).

Heart Failure: ACE Inhibitors & ARBs

- Recent advances in ARBs, a new class of drug for heart failure with reduced ejection fraction, inspired our [Heart Failure: ACE Inhibitors & ARBs](#) nest. Here, we compare the more conventional drug class (ACE Inhibitors) against ARBs.
