

Manuscript

This page describes how to view and interpret the Manuscript output in Synthesis. To learn how to use the Manuscript Editor in AutoLit, click [here](#).

1. Navigate to Manuscript

After entering Synthesis, select “Manuscript”:

2. Interacting with Manuscript

Manuscript is not editable from the Synthesis view. However, you can still do the following:

Use the Table of Contents

Select “Show Table of Contents” to open the Table of Contents (red outline), which allows you to navigate to any section by selecting it.

Title	First Author	Year	Intervention	Arm Size	Intervention
Thrombectomy within 8 hours after symptom onset in ischemic stroke.	Jovin, Tudor G	2015	Stent-triever	103	Stent-triever
Thrombectomy within 8 hours after symptom onset in ischemic stroke.	Jovin, Tudor G	2015	Standard Care/Medical Therapy	103	Standard Care/Medical Therapy
Stent-retriever thrombectomy after intravenous t-PA vs. t-PA alone in stroke.	Saver, Jeffrey L	2015	IVT alone	98	IVT alone
Stent-retriever thrombectomy after intravenous t-PA vs. t-PA alone in stroke.	Saver, Jeffrey L	2015	Stent-triever + IVT	98	Stent-triever + IVT
Randomized assessment of rapid endovascular treatment of ischemic stroke.	Goyal, Mayank	2015	Standard Care/Medical Therapy	150	Standard Care/Medical Therapy
Randomized assessment of rapid endovascular treatment of ischemic stroke.	Goyal, Mayank	2015	Unknown MT	165	Unknown MT
A randomized trial of intraarterial treatment for acute ischemic stroke.	Berkhemer, Olvert A	2015	Unknown MT + IAT	233	Unknown MT + IAT
A randomized trial of intraarterial treatment for acute ischemic stroke.	Berkhemer, Olvert A	2015	IAT	267	IAT
Endovascular Thrombectomy with or without Intravenous Alteplase in Acute Stroke.	Yang, Pengfei	2020	Stent-triever	327	Stent-triever
Endovascular Thrombectomy with or without Intravenous Alteplase in Acute Stroke.	Yang, Pengfei	2020	Stent-triever + IVT	329	Stent-triever + IVT
Safety and Efficacy of a 3-Dimensional Stent Retriever With Aspiration-Based Thrombectomy vs Aspiration-Based Thrombectomy Alone in Acute Ischemic Stroke	Nogueira, Raul G	2018	Combination therapy	98	Combination therapy

References

View the References panel

To view the full list of References related to a Manuscript, click the “References” panel at the bottom of the page (red box in the above image).

To view the specific Reference information related to an in-text citation, click the blue text for the citation. This will open the References panel and auto-scroll to the reference of interest.

3. How does this differ from a Publication?

Note: the Manuscript feature is meant to provide an environment for drafting background, methods, textual/descriptive outcomes, and discussion. Synthesis, as the page for viewing and interpreting results of a review and meta-analysis, is shareable for the purposes of review of the outputs, whether to get feedback or to support shareable reports.

Manuscript does not represent an academic publication, as it is not peer reviewed, is presented directly by the authors, and is not indexed. We recommend that any manuscript that is meant for academic publication be left on a private Synthesis page until after submission to an appropriate journal.
