

# Risk of Bias Visuals

Nested Knowledge automatically generates your Domain Distribution and Traffic Light diagrams if you complete Risk of Bias through our AutoLit [RoB module](#).

## Navigating to Risk of Bias Visuals

Risk of Bias visuals are found on the Synthesis page, at the bottom of the Contributors column:

## Domain Distribution Diagram

Once you have navigated to the visuals, you can see the Domain Distribution plots. The categories presented will depend on the Risk of Bias survey you completed; in the visual below, see the [Cochrane RoB2 tool's](#) outputs for Internal Validity and Overall Assessment of risk. These represent global assessments across a nest, rather than study-level outputs.

## Traffic Light Diagram

Traffic Light diagrams represent study-by-study assessments, where each column is a study-level assessment of the category in question (here, the Internal Validity and Overall Assessment from [Cochrane RoB2 tool's](#) survey).

Domain DistributionTraffic Light		
Study	Internal Validity	Overall Assessment
Jovin 2015	+	+
Saver 2015	+	+
Goyal 2015	+	+
Berkhemer 2015	+	+
Yang 2020	+	+
Nogueira 2018	+	+
Lapergue 2017	+	-
Zi 2021	+	-

The study Author/Year (red box) is clickable, opening the Study Modal showing the abstract, data, tags, and search history for the study in question.
